

Getting Started: The Essentials

1. Install Visual Studio Code

Video: <https://www.youtube.com/watch?v=zK1rKC7QVwk>

2. Install Antigravity for future agentic development

Video: <https://www.youtube.com/watch?v=7pfX9NUiSNk>

3. Install the latest version of Python on your system

- Download Python from the official website:
<https://www.python.org/downloads/>
- Installation video: <https://www.youtube.com/watch?v=Qg05y10APwA>

Note: Ignore the version mentioned in the video and install the latest version available.

4. Create a Google Colab account for practice.

5. Install Ollama on your system

Video: <https://www.youtube.com/watch?v=rNoWnxco2ww>

6. If possible, get a subscription to Claude Code (industry-oriented). There will be some activities where having the token/subscription will be useful, and it would be great if you have access to it. [Optional]

Rest of the requirement we can install and do the setup in person.
